Medical Terminology

Course Description:

Medical Terminology is the study of words that pertain to body systems, anatomy, physiology, medical processes and procedures and a variety of diseases. It provides specialized language for the health care team, enabling health care workers to communicate in an accurate, articulate and concise manner. This course is designed to give the students a comprehensive knowledge of word construction, definition and use of terms related to all areas of medical science. The course includes but is not limited to terms related to anatomy of the human body, functions of health and disease, and the use of language in diagnosing and treating conditions related to all of the human body systems. This course is useful in preparing students for every career in allied health.

Suggested Course Sequence:

- Unit 1: Introduction to Medical Terminology
- Unit 2: The Human Body in Health and Disease
- Unit 3: The Skeletal System
- Unit 4: The Muscular System
- Unit 5: The Cardiovascular System
- Unit 6: The Lymphatic and Immune Systems
- Unit 7: The Respiratory System
- Unit 8: The Digestive System
- Unit 9: The Urinary System
- Unit 10: The Nervous System
- Unit 11: Special Senses: The Eyes and Ears
- Unit 12: Skin: The Integumentary System
- Unit 13: The Endocrine System
- Unit 14: The Reproductive System

Pre-Requisite:

Successful high school completion of Dynamics of Health Care in Society and a B or better in Algebra, Biology, and Chemistry, not including CPC classes.

Content Area: Health - Medical Terminology

Unit Title: Introduction to Medical Terminology - Unit 1

Grade Level: 10-12

Unit Summary: This unit identifies the four types of word parts used in forming medical terms. It also emphasizes the use of knowledge of word parts to analyze unfamiliar medical terms. This unit also describes the steps in locating a term in a medical dictionary. Commonly used word roots, combining forms, suffixes, and prefixes are introduced, as well as the "sounds-like" pronunciation system to correctly pronounce primary terms. At the end of the unit, students should be able to recognize, define, spell, and correctly pronounce primary terms.

Interdisciplinary

Connections:

SCIENCE:

2.1A - Personal Growth & Development

2.1C - Disease

2.2E - Health Services

2.3A - Medicine

SOCIAL STUDIES:

Similar connections may be made between social studies content areas (6.3) and the following areas of content such as (2.2A) interpersonal communication skills, (2.1E) social, and (2.2E) health services.

LANGUAGE ARTS LITERACY:

CCCS.ELA-LITERACY.CCRA.W.4

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

CCCS.ELA-LITERACY.CCRA.W.8

Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

CCSS.ELA-LITERACY.CCRA.W.9

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

- CRP2. Apply appropriate academic and technical skills.
- CRP4. Communicate clearly and effectively and with reason.
- CRP7. Employ valid and reliable research strategies.
- CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.
- CRP11. Use technology to enhance productivity.

CTE Standards:

- 9.3HL-HI.1 - Communicate health information accurately.
- 9.3HL-HI.2 - Describe the content and diverse uses of health information.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:	Statement:
2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.
2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.
8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.

Unit Essential Question(s):

- What are the four types of word parts used in forming medical terms?
- How can you use your word parts to analyze unfamiliar medical terms?
- Why is it important to locate a term in a medical dictionary?
- What are the commonly used word roots, combining forms, suffixes, and prefixes?
- What is the "sounds-like" pronunciation system?
- What is the importance of using abbreviations?
- How can you recognize, define, spell, and correctly pronounce primary terms?

Unit Enduring Understandings:

- The four types of word parts are a word root, a combining form, a suffix, and a prefix.
- A word part helps you determine a word's meaning by looking at the component pieces.
- Learning to use a medical dictionary is an important part of mastering the correct use of medical terms.
- Commonly used word roots are defined by usually, but not always, indicating the involved body part.

- The “sounds-like” pronunciation system is a way of respelling using normal English letters to create sounds that are familiar.
- Abbreviations are used as a shorthand way to record long and complex medical terms.
- You can recognize, define, spell, and correctly pronounce primary terms by practicing them.

Unit Learning Targets/Objectives:

Students will

- Describe the steps in locating a term in a medical dictionary.
- Describe the commonly used prefixes, word roots, combining forms, and suffixes in medical terminology.
- Identify the four types of word parts in forming medical terms.
- Recognize the importance of spelling medical terms correctly.
- Recognize, define, spell, and pronounce medical terms correctly.
- Pronounce medical terms correctly using the “sounds-like” system.
- State why caution is important when using abbreviations.
- Analyze unfamiliar medical terms using knowledge of word parts.

Formative Assessments:

Unit Assignments:

1. Complete handwritten flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare: Discussion Circle

Summative/Benchmark Assessment (s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests.

Downloadable Complete Ancillary for instructors, and a StudyWare site and CD-ROM for students

Modifications:

Special Education Students:

- Allow errors
- Rephrase questions, directions, and explanations
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.
- Consult with Case Managers and follow IEP accommodations/modifications.

English Language Learners:

- Assign a buddy, same language or English speaking.
- Allow errors in speaking
- Rephrase questions, directions, and explanations.
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.

At-Risk Students:

- Provided extended time to complete tasks.
- Consult with Guidance Counselors and follow I&RS procedures / action plans.
- Consult with classroom teacher(s) for specific behavior interventions.
- Provide rewards as necessary.

Gifted and Talented Students:

- Provide extension activities
- Build on students' intrinsic motivations.
- Consult with parents to accommodate students' interests in completing tasks at their level of engagement.

Lesson #	Lesson Name	Time frame (day(s) to complete)
1	Primary Medical Terms and Word Parts	1 day
2	Word Roots, Suffixes and Prefixes	1 day
3	Determining Meanings on the Basis of Word Parts	1 day
4	Medical Dictionary Use	1 day
5	Pronunciations	1 day

Content Area: Health - Medical Terminology

Unit Title: The Human Body in Health and Disease - Unit 2

Grade Level: 10-12

Unit Summary: This unit will help students define anatomy and physiology and the uses of anatomic reference systems to identify anatomic positions, body planes, directions, and cavities. Students will learn to recognize, define, spell, and pronounce the primary terms related to cells and genetics and the structure, function, pathology, and procedures of tissues and glands. This unit will help students to learn to identify the major organs and functions of the body systems. Students will also be able to recognize, define, spell, and pronounce the primary terms used to describe pathology, the modes of transmission, and the types of diseases.

Interdisciplinary

Connections:

SCIENCE:

2.1A - Personal Growth & Development

2.1C - Disease

2.2E - Health Services

2.3A - Medicine

SOCIAL STUDIES:

Similar connections may be made between social studies content areas (6.3) and the following areas of content such as (2.2A) interpersonal communication skills, (2.1E) social, and (2.2E) health services.

LANGUAGE ARTS LITERACY:

CCCS.ELA-LITERACY.CCRA.W.4

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

CCCS.ELA-LITERACY.CCRA.W.8

Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

CCSS.ELA-LITERACY.CCRA.W.9

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP10. Plan education and career paths aligned to personal goals.

CRP11. Use technology to enhance productivity.

CTE Standards:

9.3HL.1 - Communicate health information accurately.

9.3HL.2 - Describe the content and diverse uses of health information.

9.3.HL.4 - Evaluate the roles and responsibilities of individual members as part of the healthcare team and explain their role in promoting the delivery of quality health care.

9.3.HL.5 - Analyze the legal and ethical responsibilities, limitations and implications of actions within the healthcare workplace.

9.3.HL.6 - Evaluate accepted ethical practices with respect to cultural, social, and ethnic differences within the healthcare workplace.

9.3.HL-BRD.3 - Demonstrate basic knowledge of recombinant DNA, genetic engineering.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:

Statement:

2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.
2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.
8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
<p>Unit Essential Question(s):</p> <ul style="list-style-type: none"> ● What do the anatomic reference systems refer to? ● What are the terms associated with cytology and genetics? ● What are some of the terms that relate to the abdominal cavity and peritoneum? ● What are some of the terms that relate to the structure, function, pathology, and procedures of cells, tissues, and glands? ● What are the major body systems? 	<p>Unit Enduring Understandings:</p> <ul style="list-style-type: none"> ● The anatomic reference systems refer to position, body planes, directions, and cavities. ● The terms associated with cytology and genetics are chromosomes, genes, DNA, and mutation. ● Terms that relate to the abdominal cavity are the epigastric region, the umbilical region, and the hypogastric region. The terms that relate to the peritoneum are the parietal, mesentery, and visceral peritoneum. ● The terms that relate to structure, function, pathology, and procedures of cells, tissues, and glands are stem cells, genes chromosomes, and DNA. ● The major body systems are the skeletal system, muscular system, cardiovascular system, lymphatic system, immune system, respiratory system, digestive system, and urinary system. Other systems include the nervous system, special senses, integumentary system, endocrine system, and reproductive systems.
<p>Unit Learning Targets/Objectives:</p> <p><i>Students will</i></p> <ul style="list-style-type: none"> ● Define anatomy and physiology and use anatomic reference systems to identify the position, body planes, directions, and cavities. ● Define the terms associated with cytology and genetics including chromosomes, genes, DNA, and mutation. ● Recognize, define, spell, and pronounce the terms related to the abdominal cavity and peritoneum. ● Recognize, define, spell, and pronounce the terms related to the structure, function, pathology, and procedures of cells, tissues, and glands. 	

- Identify the body systems in terms of their major structures and functions.

Formative Assessments:

Unit Assignments:

1. Complete *handwritten* flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare: Discussion Circle

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests.

SGO Data Suggestion:

Use the Chapter 1 & 2 Test Bank to create a Pre-test/Post-test. Administer the Pre-test before the textbooks are distributed; Post-test after Unit 5.

Content Area: Health - Medical Terminology

Unit Title: The Skeletal System - Unit 3

Grade Level: 10-12

Unit Summary: This unit will help students identify and describe the major functions and structures of the skeletal system. The three types of joints are introduced. The differences between the axial and appendicular skeletons are discussed in detail. The students will also be introduced to the medical specialists who treat disorders of the skeletal system. At the end of this unit, students will be able to recognize, define, spell, and pronounce the primary terms related to the pathology and the diagnostic and treatment procedures of the skeletal system.

Content Area: Health - Medical Terminology

Unit Title: The Muscular System - Unit 4

Grade Level: 10-12

Unit Summary: This unit describes the functions and structures of the muscular system, including muscle fibers, fascia, tendons, and the three types of muscles. This unit will help students to recognize, define, pronounce, and spell the primary terms related to muscle movements, and explain how the muscles are named. By the end of this unit, students will also be able to recognize define, pronounce, and spell the primary terms related to the pathology and the diagnostic and treatment procedures of the muscular system.

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP10. Plan education and career paths aligned to personal goals.

CRP11. Use technology to enhance productivity.

CTE Standards:

9.3HL.1 - Communicate health information accurately.

9.3HL.2 - Describe the content and diverse uses of health information.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:	Statement:
2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.
2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.

8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
<p>Unit Essential Question(s):</p> <ul style="list-style-type: none"> ● What are the functions of the muscular system? ● What are the structures of the muscular system? ● What are the three types of muscle tissue? ● What are contrasting muscle motions? ● How are muscles named? ● What are some medical specialties related to the muscular system? 	<p>Unit Enduring Understandings:</p> <ul style="list-style-type: none"> ● Muscles hold the body erect and makes movement possible. ● The muscular system consists of muscle fibers, fascia and tendons. ● The three types of muscle tissue are skeletal muscles, smooth muscles, and myocardial muscle. ● Contrasting muscle motion is abduction and adduction, flexion and extension, elevation and depression, rotation and circumduction, supination and pronation, and dorsiflexion and plantar flexion. ● Muscles are named for their origin and insertion, their action, their location, their fiber direction, the number of divisions, their size or shape, and for strange reasons. ● Medical specialties related to the muscular system are exercise physiologists, a neurologist, a physiatrist, and a sports medicine physician.
<p>Unit Learning Targets/Objectives:</p> <p><i>Students will</i></p> <ul style="list-style-type: none"> ● Describe the functions and structures of the muscular system including muscle fibers, fascia, tendons, and the three types of muscle. ● Recognize, define, spell, and pronounce the terms related to muscle movements and explain how the muscles are named. ● Recognize, define, pronounce, and spell the terms related to the pathology and the diagnostic and treatment procedures of the muscular system. 	

Formative Assessments:

Unit Assignments:

1. Complete *handwritten* flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests.
6. Presentation on Pathology and Diseases of the Skeletal System.

Downloadable Complete Ancillary for instructors, and a StudyWare site and CD-ROM for students

Modifications:

Special Education Students:

- Allow errors
- Rephrase questions, directions, and explanations
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.
- Consult with Case Managers and follow IEP accommodations/modifications.

English Language Learners:

- Assign a buddy, same language or English speaking.
- Allow errors in speaking
- Rephrase questions, directions, and explanations.
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.

At-Risk Students:

- Provided extended time to complete tasks.
- Consult with Guidance Counselors and follow I&RS procedures / action plans.
- Consult with classroom teacher(s) for specific behavior interventions.
- Provide rewards as necessary.

Gifted and Talented Students:

- Provide extension activities
- Build on students' intrinsic motivations.
- Consult with parents to accommodate students' interests in completing tasks at their level of engagement.

Lesson #	Lesson Name	Time frame (day(s) to complete)
1	Functions and Structures of the Muscular System	1 day

2	Types of Muscles and Movements	1 day
3	The naming and functions of muscles	1 day
4	Pathology of the muscular system	1 day
5	Diagnostic procedures of the muscular system	1 day

Content Area: Health - Medical Terminology

Unit Title: The Cardiovascular System - Unit 5

Grade Level: 10-12

Unit Summary: This unit describes the heart in terms of chambers, valves, blood flow, heartbeats, and blood supply. The three different types of blood vessel, the major components of blood and circulation are discussed. By the end of this unit students should be able to recognize, define, spell, and pronounce the primary terms related to the pathology and the diagnostic and treatment procedures of the cardiovascular system.

Interdisciplinary

Connections:

SCIENCE:

2.1A - Personal Growth & Development

2.1C - Disease

2.2E - Health Services

2.3A - Medicine

SOCIAL STUDIES:

Similar connections may be made between social studies content areas (6.3) and the following areas of content such as (2.2A) interpersonal communication skills, (2.1E) social, and (2.2E) health services.

LANGUAGE ARTS LITERACY:

CCCS.ELA-LITERACY.CCRA.W.4

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

CCCS.ELA-LITERACY.CCRA.W.8

Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

CCSS.ELA-LITERACY.CCRA.W.9

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP10. Plan education and career paths aligned to personal goals.

CRP11. Use technology to enhance productivity.

CTE Standards:

9.3HL.1 - Communicate health information accurately.

9.3HL.2 - Describe the content and diverse uses of health information.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:	Statement:
2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.
2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.
8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.

Unit Essential Question(s):

- What are the structures of the cardiovascular system?
- What is systemic and pulmonary circulation?
- What is the heartbeat?
- What are the three types of blood vessels?
- How are blood types classified?
- What are the medical specialties related to the cardiovascular system?
- What are some of disorders of the cardiovascular system?

Unit Enduring Understandings:

- The structures of the cardiovascular system are the heart, the pericardium, the walls, chambers, and valves of the heart.
- Systemic circulation includes the flow of blood to all parts of the body. Pulmonary circulation is the flow of blood only between the heart and lungs.
- The heartbeat is the ability to pump blood effectively throughout the body.
- The three types of blood vessels are arteries, capillaries and veins.
- Blood types are classified according to the presence of absence of certain antigens.
- Medical specialties related to the cardiovascular system are a cardiologist, a hematologist, and a vascular surgeon.
- Disorders of the cardiovascular system are congenital heart defects, coronary artery disease, atherosclerosis, ischemic heart disease, angina, myocardial infarction, heart failure and carditis.

Unit Learning Targets/Objectives:*Students will*

- Describe the heart in terms of chambers, valves, blood flow, heartbeat, and blood supply.
- Identify the major components of blood and the major functions of each component.
- Recognize, define, spell, and pronounce the terms related to the pathology and the diagnostic and treatment procedures of the cardiovascular system.
- Differentiate among the three different types of blood vessels and describe the major function of each.
- State the difference between pulmonary and systemic circulation.

Formative Assessments:

Unit Assignments:

1. Complete *handwritten* flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests

------------	--

Unit Essential Question(s):

- What are the functions of the respiratory system?
- What are the structures of the respiratory system?
- What is respiration?
- What are medical specialties related to the respiratory system?
- What are some common issues of the respiratory system?
- What are the treatment procedures of the respiratory system?

Unit Enduring Understandings:

- The functions of the respiratory system are to deliver air to the lungs, convey oxygen from air to the blood, expel waste products, and produce airflow.
- The structures of the respiratory system are the nose, the tonsils, the sinuses, the pharynx, the larynx, the trachea, the bronchi, the alveoli, the lungs, the mediastinum, the pleura, and the diaphragm.
- Respiration is the exchange of oxygen for carbon dioxide.
- Medical specialties related to the respiratory system are an otolaryngologist, a pulmonologist, and a thoracic surgeon.
- Common issues of the respiratory system are COPD, Bronchitis, emphysema, and asthma.
- Treatment procedures of the respiratory system are medications, surgery, and respiratory therapy.

Unit Learning Targets/Objectives:
Students will

- Identify and describe the major structures and functions of the respiratory system.
- Recognize, define spell, and pronounce terms related to the pathology and the diagnostic and treatment procedures of the respiratory system.

Formative Assessments:
Unit Assignments:
1. Complete *handwritten* flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:
1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.

6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests

- Allow errors
- Rephrase questions, directions, and explanations
- Allow extended time to answer questions, and permit drawing, as an explanation.

- Accept participation at any level, even one word.
- Consult with Case Managers and follow IEP accommodations/modifications.

English Language Learners:

- Assign a buddy, same language or English speaking.
- Allow errors in speaking
- Rephrase questions, directions, and explanations.
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.

At-Risk Students:

- Provided extended time to complete tasks.
- Consult with Guidance Counselors and follow I&RS procedures / action plans.
- Consult with classroom teacher(s) for specific behavior interventions.
- Provide rewards as necessary.

Gifted and Talented Students:

- Provide extension activities
- Build on students' intrinsic motivations.
- Consult with parents to accommodate students' interests in completing tasks at their level of engagement.

Lesson #	Lesson Name	Time frame (day(s) to complete)
1	Structures and Functions of the Respiratory System	1 day
2	Medical Specialties related to the Respiratory System	1 day
3	Pathology of the Respiratory System	1 day
4	Upper Respiratory Diseases	1 day

5	Treatment Procedures of the Respiratory System	1 day

Content Area: Health - Medical Terminology

Unit Title: The Digestive System - Unit 8

Grade Level: 10-12

Unit Summary: This unit identifies the major structures and functions of the digestive system. The processes of digestion, absorption, and metabolism is discussed. By the end of this unit, students will be able to recognize, define, spell, and pronounce the primary terms related to the pathology and the diagnostic and treatment procedures of the digestive system.

Interdisciplinary

Connections:

SCIENCE:

2.1A - Personal Growth & Development

2.1C - Disease

2.2E - Health Services

2.3A - Medicine

SOCIAL STUDIES:

Similar connections may be made between social studies content areas (6.3) and the following areas of content such as (2.2A) interpersonal communication skills, (2.1E) social, and (2.2E) health services.

LANGUAGE ARTS LITERACY:

CCCS.ELA-LITERACY.CCRA.W.4

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

CCCS.ELA-LITERACY.CCRA.W.8

Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

CCSS.ELA-LITERACY.CCRA.W.9

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP10. Plan education and career paths aligned to personal goals.

CRP11. Use technology to enhance productivity.

CTE Standards:

9.3HL.1 - Communicate health information accurately.

9.3HL.2 - Describe the content and diverse uses of health information.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:	Statement:
2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.
2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.

8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
<p>Unit Essential Question(s):</p> <ul style="list-style-type: none"> ● What are the structures of the digestive system? ● What are the major structures of the oral cavity? ● What are the accessory digestive organs? ● What is digestion? ● What are the medical specialties related to the digestive system? ● What are the major digestive issues? ● What are the diagnostic procedures of the digestive system? ● What are the treatments of the digestive system? 	<p>Unit Enduring Understandings:</p> <ul style="list-style-type: none"> ● The structures of the digestive system the upper GI tract, the lower GI tract, and the bowels. ● The structures of the oral cavity are the mouth, the lips, hard and soft palates, salivary glands, tongue, teeth, and the periodontium. ● The accessory digestive organs are the liver, the biliary tree, the gallbladder, and the pancreas. ● Digestion is the process by which complex foods are broken down into nutrients. ● Medical specialties related to the digestive system are bariatrics, a dentist, a gastroenterologist, an oral surgeon, an orthodontist, a periodontist, and a proctologist. ● Gastric issues including eating disorders, nutritional conditions, indigestion, intestinal disorders, irritable bowel syndrome, inflammatory bowel disease, Ulcerative Colitis, Crohn's Disease, and intestinal obstructions. ● Digestive procedures of the digestive system are abdominal cts, ultrasound, cholangiography, enema, upper GI series, and stool samples. ● Treatments of the digestive system include medications, bariatric surgery, and ostomies.
<p>Unit Learning Targets/Objectives:</p> <p><i>Students will</i></p> <ul style="list-style-type: none"> ● Identify and describe the major structures and functions of the digestive system. ● Describe the processes of digestion, absorption, and metabolism. ● Recognize, define, spell, and pronounce the primary terms related to the pathology and the diagnostic and treatment procedures of the digestive system. 	

Formative Assessments:

Unit Assignments:

1. Complete *handwritten* flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests

2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.

2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.
8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
<p>Unit Essential Question(s):</p> <ul style="list-style-type: none"> ● What is the function of the eyes? ● What are the structures of eyes? ● What are the medical specialities related to the eyes? ● What are the functional defects of the eyes? ● What are the diagnostic procedures for vision and the eyes? ● What are the functions of the ears? ● What are the structures of the ears? ● What are medical specialties related to the ears? ● What are diagnostic procedures of the ears and hearing? 	<p>Unit Enduring Understandings:</p> <ul style="list-style-type: none"> ● The function of the eyes are to receive images and transmit them to the brain. ● Structures of the eyes include the adnexa of the eyes, the eyeball, the uvea, and the normal action of the eyes. ● Medical specialties related to the eyes are an ophthalmologist, an optometrist, and an optician. ● Functional defects of the eyes include diplopia, monochromatism, photophobia, and presbyopia. ● Diagnostic procedures for the vision and the eyes include diagnostic procedures, surgery and corrective lenses. ● The ears are able to receive sound impulses and transmit them to the brain. ● The structures of the ears are the outer ear, the middle ear, and the inner ear. ● Medical specialties related to the ear are an audiologist. ● Diagnostic procedures include an evaluation, audiometry, a hertz, an otoscope, and testing.
<p>Unit Learning Targets/Objectives:</p> <p><i>Students will</i></p> <ul style="list-style-type: none"> ● Describe the functions and structures of the eyes and their accessory structures. ● Recognize, define, spell, and pronounce the primary terms related to the structures and functions, pathology, and the diagnostic and treatment procedures of the eyes and vision. ● Describe the functions and structures of the ears. ● Recognize, define, spell, and pronounce the primary terms related to the structures and functions, pathology, and the diagnostic and treatment procedures of the ears and hearing. 	

Formative Assessments:

Unit Assignments:

1. Complete handwritten flashcards of chapter terms
2. Complete Learning Exercises at chapter end.

Unit Classroom Activities:

1. Daily Quiz
2. Video Overviews
3. Discuss terminology words and pronunciation.
4. Give practice in both pronunciation and understanding the words.
5. Provide students with handouts for in-class collaborative work: Crossword Puzzles, Word Searches and case studies pertinent to the unit and have students analyze and define medical terms.
6. StudyWare Games and Quizzes as time permits
7. Current events in Healthcare

Summative/Benchmark Assessment(s):

Unit Assessments:

1. Terminology quizzes
2. Class Participation: Completion of handouts, labeling diagrams, discussion contribution
3. Completion of Homework
4. Quarterly projects
5. Multiple choice and matching tests

Downloadable Complete Ancillary for instructors, and a StudyWare site and CD-ROM for students

Modifications:

Special Education Students:

- Allow errors
- Rephrase questions, directions, and explanations
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.
- Consult with Case Managers and follow IEP accommodations/modifications.

English Language Learners:

- Assign a buddy, same language or English speaking.
- Allow errors in speaking
- Rephrase questions, directions, and explanations.
- Allow extended time to answer questions, and permit drawing, as an explanation.
- Accept participation at any level, even one word.

At-Risk Students:

- Provided extended time to complete tasks.
- Consult with Guidance Counselors and follow I&RS procedures / action plans.
- Consult with classroom teacher(s) for specific behavior interventions.
- Provide rewards as necessary.

Gifted and Talented Students:

- Provide extension activities
- Build on students' intrinsic motivations.
- Consult with parents to accommodate students' interests in completing tasks at their level of engagement.

Lesson #	Lesson Name	Time frame (day(s) to complete)
1	Functions and Structures of the Eyes and Ears	1 day

2	Pathology of the Eyes and Ears	1 day
3	Diagnostic Procedures of the Eyes and Ears	1 day
4	Treatment Procedures of the Eyes and Ears	1 day
5	Medical Specialties Related to the Eyes and Ears	1 day

Content Area: Health - Medical Terminology

Unit Title: Skin: The Integumentary System - Unit 12

Grade Level: 10-12

Unit Summary: This unit identifies and describes the functions and structures of the integumentary system. Medical specialties associated with the integumentary system are discussed. By the end of this unit, students will be able to recognize, define, spell, and pronounce the primary terms related to the structures and function, pathology, and the diagnostic and treatment procedures of the skin, hair, nails, and sebaceous glands.

Interdisciplinary

Connections:

SCIENCE:

2.1A - Personal Growth & Development

2.1C - Disease

2.2E - Health Services

2.3A - Medicine

SOCIAL STUDIES:

Similar connections may be made between social studies content areas (6.3) and the following areas of content such as (2.2A) interpersonal communication skills, (2.1E) social, and (2.2E) health services.

LANGUAGE ARTS LITERACY:

CCCS.ELA-LITERACY.CCRA.W.4

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

CCCS.ELA-LITERACY.CCRA.W.8

Gather relevant information from multiple print and digital sources, assess the credibility and accuracy of each source, and integrate the information while avoiding plagiarism.

CCSS.ELA-LITERACY.CCRA.W.9

Draw evidence from literary or informational texts to support analysis, reflection, and research.

CCSS-ELA.LITERACY.CCRA.W10

Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of tasks, purposes, and audiences.

CCCS.ELA-LITERACY.RST.11-12.9

Synthesize information from a range of sources (e.g., texts, experiments, simulations) into a coherent understanding of a process, phenomenon, or concept, resolving conflicting information when possible.

WIDA English Language Development Standard 1

English language learners communicate for social and instructional purposes within the school setting.

MATH:

CCSS.MATH PRACTICES 1 and 2

Make sense of problems and reason abstractly during health data analysis.

21st Century

Themes and Skills:

Creativity and Innovation, Critical Thinking and Problem Solving, Communication and Collaboration, Information Literacy, Media Literacy, Communication Literacy, and Life and Career Skills

Career Ready Practices:

CRP2. Apply appropriate academic and technical skills.

CRP4. Communicate clearly and effectively and with reason.

CRP8. Utilize critical thinking to make sense of problems and persevere in solving them.

CRP10. Plan education and career paths aligned to personal goals.

CRP11. Use technology to enhance productivity.

CTE Standards:

9.3HL.1 - Communicate health information accurately.

9.3HL.2 - Describe the content and diverse uses of health information.

Standards (Content and Technology):

2.1 Wellness: All students will acquire health promotion concepts and skills to support a healthy, active lifestyle.

● **C. Diseases and Health Conditions**

Personal health is impacted by family, community, national, and international efforts to prevent and control diseases and health conditions

2.2 Integrated Skills: All students will develop and use personal and interpersonal skills to support a healthy, active lifestyle.

● **A. Interpersonal Communication**

Technology increases the capacity of individuals to communicate in multiple and diverse ways.

● **E. Health Services and Information**

Potential solutions to health issues are dependent on health literacy and available resources. Affordability and accessibility of healthcare impacts the prevention, early detection, and treatment of health problems.

CPI#:	Statement:
2.1.12.C.1	Predict diseases and health conditions that may occur during one's lifespan and speculate on potential prevention and treatment strategies.
2.2.12.A.1	Employ skills for communicating with family, peers, and people from other backgrounds and cultures that may impact the health of oneself and others.

2.2.12.A.3	Analyze the impact of technology on interpersonal communication in supporting wellness and a healthy lifestyle.
8.1.12.F.1	Evaluate the strengths and limitations of emerging technologies and their impact on educational, career, personal and or social needs.
